

SRC AIRSHOWS

Pitts raptor

*start Music when I start my take off roll

*over water shows will be when I enter the Box with smoke on usually from Left to right with a Knife Edge

Points to use during first half of show:

*pilot STEPHEN COVINGTON in his highly modded pitts S2S

*This pitts is #11 of only 17 factory built S2S planes

*plane was 100% redone in 2014 and all the modifications done at this time

*the RAPTOR, as Stephen has named it has a highly modified Lycoming AEIO540 engine with 12:1 pitons, custom CYL heads, cold air intake, 6 into 1 Exhaust, custom cam shaft

*The Whole tail section of the Raptor has been modified couple of those mods are the larger rudder, and elevator.

*The motor mount, Landing gear, engine cowl, and MT Prop are all after market modifications to help in the Raptors performance.

* thanks to these mods the raptor will reach speed up to 250 MPH during the routine and pull +8 and -5 Gs

When I turn the smoke off and climb up to 2500 ft and stay for aprox 1.5 mins this is the “ engine cool off time”

During this time the following points can be used:

Stephen covington is the Owner of East Texas Muscle cars in Longview Texas where they modify your car or truck. They can do anything from Dyno tuning to motor builds to paint and body. Look them up on Face book or online at East texas Muscle cars.

Stephen Started flying in 2001 and flying has been in his blood since he watched the old movie TORA TORA TORA as a kid.

Last fall Stephen as part of the Viper International airshow team went over to China and did 7 shows while he was over there for a little over a week. They have invited him back for this fall do perform once again for them.

Stephen would like to thank his sponsors if it wasn't for them the RAPTOR would not be what it is today!

*Earth X Batteries

“Charge your ride with Lithium Earth X batteries”

*Softie Parachutes who made the Custom Raptor Chute for Stephen visit them at

softieparachutes.com

*JL Aero. Aircraft maintenance in Gilmer Texas

*Jones Graphix out of Lindale TX

*Point to Point navigation Provided By iFly GPS
