RATOR BIO

***pilot Stephen Covington in his highly modified pitts S2S**

***This Pitts is #11 of only 17 factory built S2S planes**

***The Raptor was 100% rebuilt in 2014 and all the modifications were done at this time**

***the Raptor, as Stephen named it, has a Modified Lycoming AEIO 540.**

***The whole tail section of the raptor has been modified, to include a larger rudder, and elevator.**

***The motor mount, landing gear, engine cowl, and whirlwind Propeller all are aftermarket modifications that give the Raptor, superior performance.**

***Thanks to these modifications the raptor will reach speeds up to 250 MPH during todays performance and pull up to 10 positive Gs while being able to push as many as 6 negative Gs.**
